1.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification: in paragraph [0022], third line insert -- a -- before "longer".

In the claims:

This application is in condition for allowance except for the presence of claims 1-4 directed to apparatus claims non-elected without traverse. Accordingly, claims 1-4 been cancelled.

The following is an examiner's statement of reasons for allowance: Applicants' amendments to the specification have mostly corrected the objections to the specification as noted in section 2 of the action mailed 5/18/2007, however well it is noted that the phrasing in paragraph [0022] has been improved, it is still non-idiomatic English, as more than and appropriate English phrasing would be -- movable a longer way... -- , hence this minor correction has been made by the examiner in the above amendment.

Applicants amendments to the claims have taken into consideration comments made by the examiner in the previous action, and have clarified applicant intent & specific movement & crystallization steps and sequences with respect to mask and stage movement, as well as crystallization within blocks and between blocks, to dust differentiate over the previously applied close as prior art of IM (6,368,945).

Update of the prior art, plus search of additional terms in consideration of new limitations, did not retrieve any prior art applicable to the claims as now written. However, patent to Voutsas et al. (6,495,405 B2) is noted to be of interest, particular figures 3-5, which illustrate a series of incremental

irradiation steps which may be considered to correspond to applicant's process within a block, however Voutsas et al. (405) as illustrated in figure is 6-7 does not in the next block affect crystallization in the same direction (first or action) as claimed in the present case, but employs their mask so as to cause a rotation of orientation, thus is different than the present claims. A patent to cam (7,250,331 B2 & 7,294,857 B2) & Sposili et al. (6,908,835 B2) are of interest for further SLS crystallization procedures for silicon, however are not prior art and do not claim a procedure as in the amended claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marianne L. Padgett whose telephone number is (571) 272-1425. The examiner can normally be reached on M-F from about 8:30 a.m. to 4:30 p.m.
